Become a Sponsor or Exhibitor

and present your company at the DC/DC-Wandler-Tag
in Würzburg on 7 October 2020.

DC/DC Converter Knowhow for Practical Application

DC/DC converters are among the most essential and most widely used standard components in the design of electronic devices. The quality of an electronics solution depends on considerably chosen converter types as well as practical design-in experience. Developers have to pay attention to a wide range of technological criteria and application-related aspects.

The DC/DC-Wandler-Tag shall give support and establish a forum for presenting and discussing main fundamentals, application expertise as well as new technologies and components.

Main focus

- Fundamentals and functional principles of DC/DC converters
- Trends and new technologies
- Selection of a suitable converter
- Correct use of DC/DC converters and application aspects
- Best practice examples and new converter types
- Different requirements in industrial electronics and mechanical engineering, computer engineering and telecommunications, automotive and transportation, medical engineering and mechatronics, power electronics and energy engineering

Target groups

- Hardware developers
- Power supply designers
- Power management experts
- System designers for industrial electronics and automation, telecommunications and computer engineering, energy engineering, aerospace engineering
