

femengineering

Conference Award

Present yourself as a partner of the event!

With Femengineering – Conference & Award, we address the challenges of women in engineering. Our mission is to connect and honor women and build a platform, which not only inspires the next generation of leaders, but also provides a community for those who are currently outstanding.

December 9, 2021 | Vogel Convention Center Würzburg | Hybrid Event

Empowering Women in Industry

We address the challenges of women in engineering:

With Femgineering – Conference & Award, we want to promote more transparency and a more self-evident mindset towards female leadership in engineering. Inspiring and excellent examples show successful women, but also companies with a clear attitude towards the advancement of women and mixed digital leadership – because they exist and we put these personalities and companies in the spotlight.

■ Conference

At the **Femgineering Conference** we will address and discuss the challenges facing the industry: How do science and industry manage to attract young talents and women as engineers? How does the industry approach the transformation from a „product-driven“ to a „human-centered“ company?

In interactive and entertaining sessions, we want to connect women and motivate them to take an active role in shaping this transformation in industry and society.

■ Award

The **Femgineering Award** honors outstanding female engineers and companies that promote women in the mechanical engineering, electronics, automotive and life sciences sector. Young talents, successful female engineers in management positions, clever female researchers and courageous female founders are in the spotlight and are honored for their achievements and personal commitment.
